DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-20 in the reply filed on 7-20-05 is acknowledged. Applicant also cancelled claims 21-29.

Information Disclosure Statement

The references cited within the IDS document received on 1-22-04 have been considered.

Specification

The disclosure is objected to because of the following informalities:
A brief description of the drawings is missing from the applicant's specification, as well as reference to the specific numerals used in the drawings.
Appropriate correction is required.

Drawings

The drawings are objected to because figure 3-5 are illegible. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should

Art Unit: 2812

include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: all reference characters from figures 1 and 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If

Art Unit: 2812

the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's sole independent claim 1, as well as dependent claims 10 and 11, recite a reagent of the formula $A_mX_nB_o$, wherein **A** is a reactive group, **X** is a linking group and **B** is a coordinating group having a metal bound thereto, and wherein **m** is an integer of from 1-3, **n** is an integer of from 0-20 and **o** is an integer of from 1-3. Giving independent claim 1 its broadest reasonable interpretation, integer **n** is given a value of zero, thus changing the formula to A_mB_o and thus eliminating the linking group from the chemical equation. However, the applicant positively recites a linking group in the claims and does not disclose any chemical structures within the disclosure/examples which do not have a linking group. It is unclear to the examiner as to what the chemical structure used by the applicant is, and what is intended to be the claimed invention

Art Unit: 2812

since the disclosure does not provide support for chemical formula A_mB_o . (Claims 2-9 and 12-20 are also rejected since they depend from claim 1.)

Allowable Subject Matter

Claims 1-20 would be allowable if amended to properly overcome the rejection under 35 USC 112, second paragraph.

Conclusion

The following references are cited as being particularly related to the applicant's invention: Kalyanam (6,491,978 B1) and DeYoung et al. (6,953,041 B2).
